Installation Instructions:

Thank you for purchasing this Bluetooth receiver. This product gives a stereo receiver with rear auxiliary input the ability to receive a Bluetooth signal thereby allowing many portable media devices to transmit music wirelessly. Give your stereo the instant audio upgrade its been needing without having to purchase an entirely new unit!

*Note. In order to take advantage of this Bluetooth receiver , please note the portable music device must contain the Bluetooth option.

Step1. Connect the RCA terminal of the Bluetooth receiver (HM1079) to the aux. input located on your stereo.

Step 2. Wire you ground (black wire) to the negative terminal of your boat battery.

Step 3. Wire you positive (red wire) to the ignition lead. This will turn off the Bluetooth receiver When the ignition is off thereby reducing current draw.

Step 4. Select Mode "AUX" on your stereo receiver.

Step 5. Pair your Bluetooth enabled device to **Coast** and enjoy wireless streaming of audio
